When You Deserve The Best

The 1993 PaceArrow®

BY FLEETWOOD®
This brochure features photography of the Pace Arrow 33X model with the Costa Mesa Brown interior. The features described are in selected models. See your dealer for complete details. Cover photo taken near Sedona, AZ.

The first Pace Arrow motor home, built in 1969, and its contemporary counterpart in 1993.
Right from the start, over forty years ago, quality and value were keystones at Fleetwood. Today that tradition is still evident in everything that Fleetwood produces. But never more evident than in the new 1993 Pace Arrow.

The original goal of the Pace Arrow engineers and designers was to produce an elegant motor home that was luxurious and dependable. Over the years, Pace Arrow has retained these qualities and has solidly earned its reputation as one of the most desirable motor homes on the road today.

For nearly a quarter of a century the ultimate dream of motor home owners has been to step up to a Pace Arrow. They know what the ideal motor home should be...and it should be Pace Arrow!

Now you can step up to the excellence of Pace Arrow, because the ultimate dream has also become the affordable dream! When you deserve the best, you should treat yourself to the best. Pace Arrow.
The 1993 Pace Arrow introduces you to the leading edge of RV refinement. The innovative Pace Arrow was the first to come out with an aerodynamic one-piece fiberglass front end and crowned roof. Less air resistance means better fuel economy and adds to a smoother, quieter, more comfortable ride.

Pace Arrow
The Leading Edge of RV Refinement

Wraparound urethane bumpers are flexible to resist dings and are backed by a sturdy steel impact beam.

Pace Arrow's large, curved windshield provides an excellent panoramic view.

Halogen headlights and integrated wrap-around turn signals offer the utmost in safety. The rugged stretch-formed aluminum grille has chip-resistant powder paint. Behind the grille are built-in air baffles to direct the flow of air to the engine for more efficient cooling.

The 1993 Pace Arrow features a large upper body radius to lower body profile for better air management. The fuel fill is rear mounted for convenience. The large wrap-around taillights are integrated into Pace Arrow's automotive body styling. An exterior wash-down kit makes rinse-offs easy when you're outside.

Pace Arrow's Storage System

Pace Arrow's exterior storage capacity is legendary. The doors are one-piece heavy-gauge aluminum with heli-arc welded frames. Die-cast metal paddle latches are flush mounted and have an integrated key lock. It only takes one hand to open and close the doors. Gas lift struts hold the doors up, letting you use both hands to load and unload. Continuous one-piece bulb seals keep dust and water out. The compartments are made of corrosion resistant galvanized steel and are lined with mildew resistant Ozite carpet to protect your cargo. Each compartment also has a utility light for convenience.
The driver's environment is ergonomically designed for efficiency and comfort. The color-keyed, precision molded dash with soft foam cover houses full instrumentation with fiber optic back lighting.

Pace Arrow
As Functional As It Is Attractive

A new Fleetwood designed advanced chassis electrical center makes checking and maintaining your Pace Arrow a whole lot easier. Instead of a confusing collection of colored wires, each wire includes easy to read labeling printed all along the insulation. Each and every circuit is clearly identified for better organization and ease of service. The wiring harnesses are equipped with pin and socket connectors, so they will only go into the receptacle one way...the right way.

Pace Arrow offers a standard driver's door that includes a molded, sculpted door panel with padded inserts and an arm rest for comfort. A handy map pocket, a safe and secure double-latch lock and a power window are also included.
Pace Arrow

A Feeling of Openness For You and Your Belongings

The 1993 Pace Arrow provides truly generous amounts of interior space. The efficient use of that space denotes a feeling of openness for passengers and their belongings.

To make the Pace Arrow unique, interior features have been carefully planned and balanced. The furnishings are newly restyled and protected by Scotchgard® Fabric Protector. Fluorescent light fixtures were added in the kitchen and living area for a more residential feel. Burn-resistant ceramic tile countertops were installed with rolled edges, Corian® backsplash and Colorlastec® grout. Colorlastec grout provides durable, flexible stain resistant protection for your countertops...the place you need it most.

You'll also appreciate Pace Arrow's luxury touches, like quality Flexsteel® furnishings, a Hydroflame® furnace coupled with rigid metal furnace duct, custom-designed window treatments, and upgraded cut pile carpeting. Pace Arrow also features a generous amount of real wood throughout, including oak molding in the living and bedroom areas and face frame cabinetry with solid oak raised panel doors and trim.

Selected upholstery fabrics are genuine WEAR-DATED® fabrics and are warranted for two full years by Monsanto.

The freshly restyled Magic Bed is a comfortable couch by day and a roomy 50"x75" bed by night.
Pace Arrow
A Chef's Delight

Personalize Your Galley...

Pace Arrow’s dinette design includes a number of features right at your fingertips. A decorative light fixture, cup holders, a sliding adjustment on the lightweight table, dual pull-out storage bins and a 120V receptacle are all conveniently located in the dinette area.

...To Suit Your Lifestyle

Or choose the residential-style free standing dinette. The expandable table and swivel chairs are versatile and comfortable. Two extra wooden folding chairs store out of the way in the bedroom when not in use.

Pace Arrow’s galley boasts a level of luxury found only in the finest homes. Included is a water filter with its own faucet for great tasting water and coffee. The standard Black & Decker® Lo-Profile coffee maker with thermal carafe is another Pace Arrow plus. Additional galley features include a large double door Dometic® refrigerator, Magic Chef® range and oven, solid oak cabinet door and drawer fronts and polished brass door pulls and back plates. A centrally located RV systems monitor panel lets you check the state of your LP gas, fresh water and waste water holding tank levels, and house and vehicle batteries. For family safety and protection, an LPG leak detector, CO detector, smoke detector and fire extinguisher are standard.
Pace Arrow

The Bedroom Greets You With Warmth and Familiarity

The Pace Arrow bedroom greets you with a sense of familiarity. It's just like home, but with a little more finesse. To achieve this combination of luxury and friendliness, designers included residential style features throughout the suite. The custom bedspread is coordinated with the valances and day/night shades. There are oak crown moldings between the ceiling and walls as well as an oak chair rail trimmed with brass. Rear stereo speakers provide sound clarity. Two 120V outlets are easily accessible for electric blankets or alarm clocks.

A residential style wash basin with plenty of cabinet room for medicines and toiletries is standard. A large mirror with makeup lighting and a wardrobe tall enough for dresses makes travelling in the Pace Arrow a dream.

Pace Arrow’s luxurious bath feature a garden-style tub/shower with a large dressing area. A unique shower has a tempered glass wall. Folding doors make stepping in and out of the shower easier. The tub is full size and made of sturdy ABS. A skylight lets natural light in and a power vent lets steam out.

A handy corner storage cabinet has been provided beneath the bedroom TV shelf. Angled for viewing, a larger 13” TV is also available in selected models.

- 7.0 KW Onan® Generator
- Rear Television with Remote
- Stainless Steel Wheel Simulators
- Color Television with Remote
- Fog Lights
- Panasonic® VCR
- Hydraulic Levelers
- Convection Microwave Oven
- Lounge Recliner
- Washer/Dryer
- Winter Package
- Rear Vision Camera

_Not all models include all options. See your dealer for complete details._

---

Fleetwood has designed its motor home brands to provide a variety of potential uses for its customers. Each unit features the optimum storage, fluid, seating and sleeping capabilities. While the customer enjoys this potential, he also has the responsibility to select the proper combinations of loads without exceeding the chassis weight capacities. To assist you in this selection, each motor home has posted inside the wardrobe a weight calculation form stating actual unit weight with factory installed options.
Models 30E and 32H

Highlights: Choose either an island queen bed, double bed or twin beds in the rear bedroom. These popular layouts also include a private bath with large tub/shower, sofa bed and swivel chair, built-in dinette and wardrobe storage. Vinyl flooring is standard in the galley and bath areas.
