

2009 *View*[®]

2009 *View*[®]

Power and economy. To those who believe you have to sacrifice one to get the other, let us introduce the 2009 Winnebago View[®]. Built on a nimble Dodge[®] Sprinter chassis powered by a Mercedes-Benz[®] 3.0L V6 turbo-diesel engine, the View embodies Winnebago Industries' revolutionary vision that launched the RV industry 50 years ago. It features Adaptive ESP[®] technology that senses vehicle load and performance parameters to maximize handling, control and driving stability. Inside, the View incorporates SmartSpace[™] design to create streamlined, feature-filled floorplans. See the country from a new perspective in a Winnebago View.

Plenty to love.

The View interior teems with comfort, style and versatility, such as cab seats that swivel to face the living area in the 24P. The centrally located skylight creates an open and airy feel while providing climate control with an easy-to-use vent. Choose the available overhead entertainment center (NA 24A) and available 300-watt inverter to enjoy the 32" TV when shoreline or generator power is not available. A stereo system with CD/DVD player comes standard. You can also listen to the radio, CDs or the weather band on the RV Radio®, which includes a remote and a cable connector for your iPod/MP3 player. Upgrade to Sirius® Satellite Radio for more channels and a complimentary six-month subscription.

The galley makes quick work of meal preparation and cleanup with a stainless steel sink, three-burner range top and a microwave/convection oven. A solid-wood sink cover expands your countertop space and an available water filtration system delivers filtered, cold water to the galley faucet.

The **WEB** icon designates a Winnebago Industries Key Feature. For further in-depth information and photos, use the drop-down Menu or click on the 'Key Features' page at gowinnebago.com.

FULL-EXTENSION SLIDES Drawers extend fully for easy access. It's part of the SmartSpace™ design philosophy that increases storage capacity and makes the most of the available space.

BUNK BEDS The 24P features rear bunk beds with available DVD players for each bunk.

Make it yours.

You'll find suitable sleeping accommodations with beds in the overhead bunk, sofa/sleeper and BenchMark® dinette, depending on your floorplan.

Personalize your coach by selecting from standard graphics, available deluxe graphics or available full-body paint. Conveniences like power mirrors with defrost and built-in turn signal indicators, plus a 5,000-lb. hitch⁵ with 7-pin wiring allow you to bring along some big toys. Available features include a rearview monitor, patio awning and an LP or diesel generator for plenty of A/C power when you need it. You can also add built-in cab window blinds for extra privacy.

SOFA/SLEEPER For the comfort of air without the hassle, an air mattress in the sofa/sleeper inflates and deflates quickly with an automatic pump (24A & 24P).

BUNK You'll have easy coach-to-cab access thanks to gas struts and a hinged bunk that allow the bed to stay propped up and out of the way until bedtime. A standard bunk ladder provides easy access to the overhead bunk.

WEB BenchMark The versatile BenchMark full-comfort dinette features innerspring cushions, flip-up access to storage and the ability to change into a comfortable bed. An integrated child safety seat tether provides a place for securing car seats (24J).

WEB TRUELEVEL TrueLevel uses sonar technology to measure tank levels without probes for accurate readings every time.

POWER LOCKS A keyless remote provides quick and easy access to the cab doors.

STORAGE DRAWER The hinged lid on the roll-out storage drawer (24H & 24J) seals tight to keep out the elements. A handy drain plug in the rotocast compartment makes it easy to rinse clean.

WEB SMART STORAGE The split-mattress design of the rear bed in the 24J allows convenient access to side-by-side storage compartments. Our innovative Smart Storage™ design philosophy is evident in the exterior compartment that expands to store large items.

2009 View® Floorplans & Specifications

Dimensions shown are for sleeping space only and may vary due to styling differences. Dashed lines denote overhead storage areas. Floorplans and specifications are also available online at: gowinnebago.com

Warranty⁶

12-month/15,000-mile basic warranty,⁷
36-month/36,000-mile limited warranty on structure,⁷ 10-year limited parts and labor warranty on roof skin⁷

- The height of each model is measured to the top of the tallest standard feature and is based on the curb weight of a typically equipped unit. The actual height of your vehicle may vary by several inches depending on chassis or equipment variations. Please contact your dealer for further information.
- The load capacity of your motor home is designated by weight, not by volume, so you cannot necessarily use all available space when loading your motor home.
- Capacities are based on measurements prior to tank installation. Slight capacity variations can result due to installation applications.
- Capacities shown are tank manufacturer's listed water capacity (W.C.). Actual filled LP capacity is 80% of listing due to overfilling prevention device on tank.
- Actual towing capacity is dependent on your particular loading and towing circumstances which includes the GVWR, GAWR, and GCWR, as well as adequate trailer brakes. Please refer to the Operator's Manual of your vehicle for further towing information.
- See separate chassis warranty details provided in Owner's Manual.
- See your dealer for complete warranty information.

Optional.

NA Not Available

Not all items available in combination. See dealer for details.

Winnebago Industries® continuing program of product improvement makes specifications, equipment, model availability, and prices subject to change without notice. Comparisons to other motor homes are based on the most recent information available at printing.

Built by Winnebago Industries. Built to last.

Winnebago motor homes are built by Winnebago Industries, the company that defined motor homes. The company that built its reputation on quality construction. The company that transformed the motor home concept into a way of life.

Today, Winnebago Industries brings that reputation for quality and its 50-year history of RV innovation to the design and construction of

WEB every motor home. It's all a part of SuperStructure®, our exclusive system of proprietary structural components that instills each motor home with improved strength and durability.

Solid Foundation Steel and aluminum truss work provides a solid, flat foundation for the floor and sidewalls. Winnebago Industries engineers also take special care to distribute the weight of components to ensure proper handling and stability.

Interlocking Joints

The floor, sidewalls and roof are all integrally connected using interlocking joints. This creates a View body that acts as a cohesive unit for improved strength and durability.

Attention to Detail Whether it's sending every View through a high-pressure water tunnel to check for leaks or labeling individual wires and barcoding parts to save time and frustration during service, Winnebago Industries considers every detail to ensure your Winnebago motor home provides you with years of pleasure.

Strong as Steel Appliances are secured directly to embedded steel plates for added safety.

E-Coating Winnebago Industries employs an automotive-style dip tank process to apply an advanced electrodeposition coating on critical steel components for corrosion protection.

Thermo-Panel® Sidewalls Invented by Winnebago Industries, Thermo-Panel construction combines a fiberglass panel, high-density, block-foam insulation and aluminum support structures to create some of the most durable, lightweight sidewalls in the industry.

1-year-old Winnebago fiberglass roof

1-year-old competitor's rubber roof

Fiberglass Roof The View features a crowned, one-piece fiberglass roof, backed with a 10-year limited parts-and-labor roof skin warranty. Fiberglass offers superior strength, attractiveness and durability over the rubber roofs found on many competitive models which can chalk, streak and degrade over time. Fiberglass also provides increased puncture and tear resistance.

gowinnebago.com Visit us on the web for more info on all of our motor homes, the latest product updates and a host of web-exclusive content.

Take a Tour We're proud of our process, state-of-the-art facilities and the people who make Winnebago Industries number one. We invite you to visit our complex in Forest City, Iowa, for a first-hand look at the dedication and technology behind every motor home we build.

Recognized Quality The Recreation Vehicle Dealer Association annually rates RV manufacturers and awards the Quality Circle award to manufacturers who provide exceptional products, service and support. Winnebago Industries is proud to be the only manufacturer to receive this award every year since its inception.

Committed to Service We back our motor homes with the industry's best service after the sale.

- 12-month/15,000-mile basic limited warranty
- 36-month/36,000-mile warranty on structure
- Standard 10-year limited parts-and-labor roof skin warranty
- Complimentary 24-hour roadside assistance program

- RV Technical Assistance Hotline
- Emergency Trip Interruption
- Nationwide Trip Routing
- RV Service Appointment Assistance
- Emergency Message Service
- Fee-Free Travelers Cheques

- TripSaver Fast Track Parts. TripSaver guarantees that in-stock warranty parts ship directly to your dealer within 24 hours.
- National dealer service network

WIT Club Winnebago owners are like family. Joining the Winnebago-Itasca Travelers is a great way to meet and travel with other Winnebago enthusiasts. Members enjoy:

- Caravans and rallies
- Local and state group activities
- RV travel benefits
